

Simple Rostering System

COMP3760 IS Project
S1 2008

Ben Griffiths

Supervised by Eric McCreath

Outline

- Overview
- Significance
- Technologies
- Schedule
- Challenges
- Conclusion

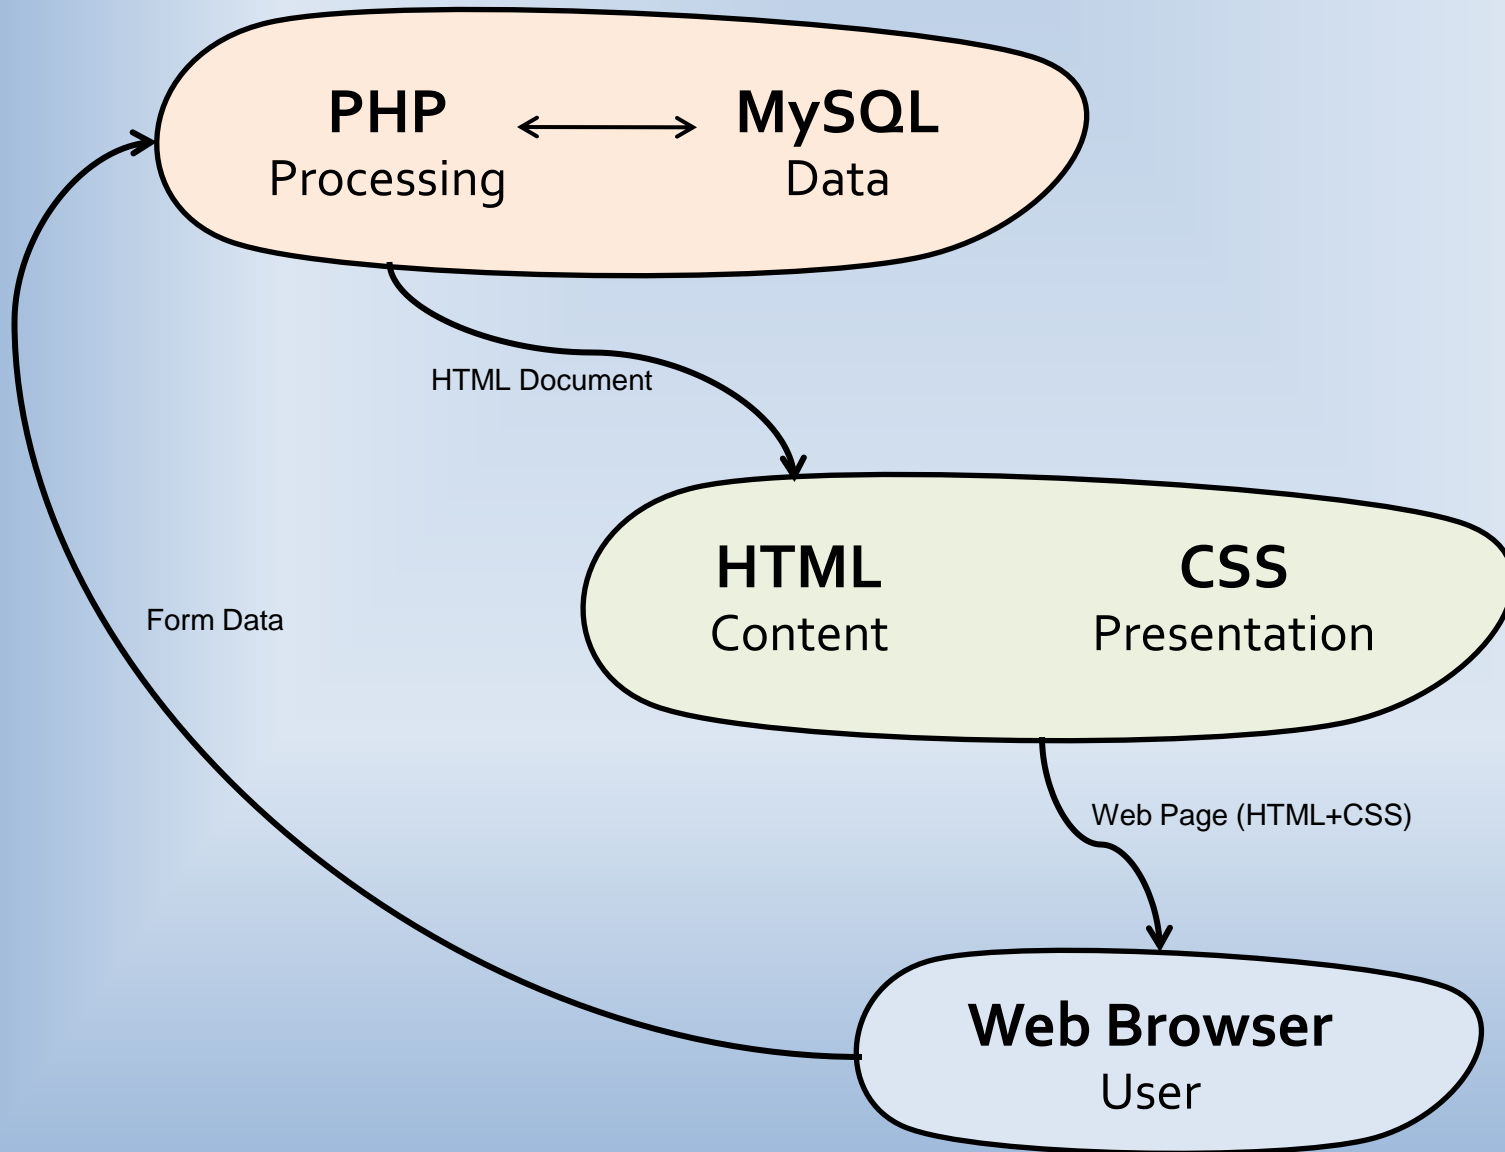

Overview

- Simple Rostering System (SRS)
- For use in the workplace & community groups
- Web-based system
- Heavily integrated with email
- Potential for Open Source release

Significance

- Simpler than similar commercial products
- Lack of similar Open Source solutions
- Useful to a wide variety of communities
- Streamlines communication & organisation
- Superior portability & accessibility

Technologies

Schedule

Tasks	Week	2	3	4	5	6	7	8	9	10	11	12	13	14
Project/Supervisor Selection														
Contract Finalised														
Initial Report & Presentation														
Project Report														
Prototyping														
Database Design/Modelling														
PHP Code Design/Modelling														
Interface Design														
Prototype & Report Outline														
Database Implementation														
PHP Code Implementation														
Interface Implementation														
Testing & Evaluation														
Finalize DB/Code/Interface														
Final Presentation														
Final Submission														
Tasks	Week	2	3	4	5	6	7	8	9	10	11	12	13	14

Challenges

- Finalising database structure
- Managing complexity/scope
- PHP Structure – modular, flexible, efficient

Conclusion

This was the SRS project in a nutshell
